

PyPI

<https://pypi.org> · 8 pages crawled · completed in 48.4s

Overall SEO score 61.1/100 (grade D) with 0 critical and 45 high-priority issues across 8 crawled pages.

Weighted from technical 25% · on-page 20% · content 20% · authority 15% · AI search 10% · speed 10%.

01 · EXECUTIVE SUMMARY

What we found

Strengths

- Authority at 70.5/100
- Page Speed at 87.4/100

Weaknesses

- Ai Score at 48.9/100
- Error Score at 26.0/100
- Google Optimized at 51.6/100

Opportunities

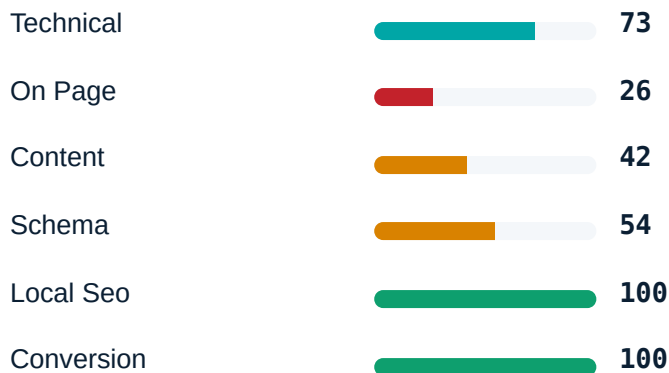

- H1 heading missing
- H1 heading missing
- H1 heading missing

Do this first (next 30 days)

1. Add exactly one H1 containing the primary keyword, under 60 characters.
2. Add exactly one H1 containing the primary keyword, under 60 characters.
3. Add exactly one H1 containing the primary keyword, under 60 characters.
4. Add exactly one H1 containing the primary keyword, under 60 characters.

ISSUES	CRITICAL	HIGH	MEDIUM	LOW	TOTAL
count	0	45	28	36	109

Where the score comes from

Error score starts at 100 and subtracts weighted penalties per issue (critical 12, high 6, medium 2.5, low 0.8), with repeats discounted so one sitewide mistake cannot zero the score.

Google-optimised checklist

CHECK	SCORE	DETAIL
Indexable pages	10.0/10	8/8 pages indexable
HTTPS everywhere	6/6	HTTPS + redirect from HTTP
Canonical tags	2.2/6	3/8 pages have a canonical
Title tags (30-60 chars)	1.2/10	1/8 within range
Meta descriptions (70-160)	3.0/8	3/8 within range
Single H1 under 60 chars	1.0/8	1/8 pages compliant
Keyword targeting	2.8/12	average on-page keyword placement 19/100
Image alt text	0.4/8	5/97 images have alt text
robots.txt + XML sitemap	8/8	site files present and linked
Mobile viewport	6.0/6	8/8 pages
No broken internal links	8/8	0 broken internal links
Unique titles / content	3.0/6	2 duplication issues
Structured data	0.0/4	0/8 pages carry schema

Every issue, in the order it should be fixed

High — 45 issues

H1 heading missing

HIGH

<https://pypi.org/project/102203594-topsis>

WHAT WE FOUND	Page has no H1 heading.
WHY IT MATTERS	The H1 tells users and crawlers what the page is about in one line.
RECOMMENDED FIX	Add exactly one H1 containing the primary keyword, under 60 characters.
EXPECTED BENEFIT	Clearer topical relevance.

102203594-topsis 0.1.0

`pip install 102203594-topsis`

Released: Jan 19, 2025

A Python implementation of the TOPSIS

Navigation

- Project description
- Release history
- Download files

Project description

TOPSIS (Technique for Order Preference by Similarity to Ideal Solution)

Overview

TOPSIS - This is a method which we can use to make decisions if we have multiple parameters from which we have to decide which model to choose by giving weights(preference) to those parameters and maximising or minimising them.

Features

- Supports CSV input files.
- Handles numeric validation for criteria columns.
- Accepts weights and impacts for criteria.
- Detailed error messages for invalid inputs.
- Outputs the TOPSIS score and rank for each alternative.

H1 heading missing

HIGH

<https://pypi.org/project/1neuron-pypi-overlordiam>

WHAT WE FOUND	Page has no H1 heading.
WHY IT MATTERS	The H1 tells users and crawlers what the page is about in one line.
RECOMMENDED FIX	Add exactly one H1 containing the primary keyword, under 60 characters.
EXPECTED BENEFIT	Clearer topical relevance.

Screenshot captured from <https://pypi.org/project/1neuron-pypi-overlordiam> — the highlighted element is the issue.

H1 heading missing

HIGH

<https://pypi.org/project/256-encrypt>

WHAT WE FOUND	Page has no H1 heading.
WHY IT MATTERS	The H1 tells users and crawlers what the page is about in one line.
RECOMMENDED FIX	Add exactly one H1 containing the primary keyword, under 60 characters.
EXPECTED BENEFIT	Clearer topical relevance.

H1 heading missing

HIGH

<https://pypi.org/project/3pc-panel>

WHAT WE FOUND	Page has no H1 heading.
WHY IT MATTERS	The H1 tells users and crawlers what the page is about in one line.
RECOMMENDED FIX	Add exactly one H1 containing the primary keyword, under 60 characters.
EXPECTED BENEFIT	Clearer topical relevance.

H1 heading missing

HIGH

<https://pypi.org/search/>

WHAT WE FOUND	Page has no H1 heading.
WHY IT MATTERS	The H1 tells users and crawlers what the page is about in one line.
RECOMMENDED FIX	Add exactly one H1 containing the primary keyword, under 60 characters.
EXPECTED BENEFIT	Clearer topical relevance.

Images missing alt text

HIGH

<https://pypi.org/>

WHAT WE FOUND	10 of 11 images have no alt text.
WHY IT MATTERS	Alt text is required for accessibility and is how images earn image-search traffic.
RECOMMENDED FIX	Add descriptive alt text (5-12 words) to every meaningful image; leave decorative images alt="".
EXPECTED BENEFIT	Image search traffic plus accessibility compliance.

Images missing alt text

HIGH

<https://pypi.org/project/102203594-topsis>

WHAT WE FOUND	1 of 1 images have no alt text.
WHY IT MATTERS	Alt text is required for accessibility and is how images earn image-search traffic.
RECOMMENDED FIX	Add descriptive alt text (5-12 words) to every meaningful image; leave decorative images alt="".
EXPECTED BENEFIT	Image search traffic plus accessibility compliance.

errorIcon.svg

The screenshot shows the PyPI project page for **102203594-topsis 0.1.0**. The page has a blue header with the project name and version. Below the header, there is a navigation bar with links for Help, Docs, Sponsors, Log in, and Register. The main content area is divided into two columns. The left column contains a 'Navigation' section with links for Project description, Release history, and Download files. Below this is a 'Verified details' section with a green checkmark and a link to the project's details. The right column contains a 'Project description' section with the title 'TOPSIS (Technique for Order Preference by Similarity to Ideal Solution)' and an 'Overview' section. The 'Overview' section describes the TOPSIS method and its purpose. Below the overview is a 'Features' section with a list of features: Supports CSV input files, Handles numeric validation for criteria columns, Accepts weights and impacts for criteria, Detailed error messages for invalid inputs, and Outputs the TOPSIS score and rank for each alternative. At the bottom of the page, there is a 'Maintainers' section with the names Shauryaaj123 and gravata.

Meta description missing

HIGH

<https://pypi.org/project/102203594-topsis>

WHAT WE FOUND	No meta description tag.
WHY IT MATTERS	Google writes its own snippet, which often ignores your offer and hurts click-through.
RECOMMENDED FIX	Write a 140-160 character description with the keyword and a call to action.
EXPECTED BENEFIT	Higher CTR from the same ranking position.

The screenshot shows the PyPI project page for **102203594-topsis 0.1.0**. The page header includes a search bar and navigation links (Help, Docs, Sponsors, Log in, Register). The main section displays the project name and version, along with a 'Latest release' button. Below this, a code block shows the command `pip install 102203594-topsis`. The description states 'A Python implementation of the TOPSIS'. The navigation menu on the left highlights 'Project description'. The 'Project description' section is expanded, showing the title 'TOPSIS (Technique for Order Preference by Similarity to Ideal Solution)' and an overview of the method. The 'Features' section lists several capabilities: Supports CSV input files, Handles numeric validation for criteria columns, Accepts weights and impacts for criteria, Detailed error messages for invalid inputs, and Outputs the TOPSIS score and rank for each alternative.

EXPECTED BENEFIT	Prevents duplicate-content dilution.

Multiple H1 tags on one page

MEDIUM

<https://pypi.org/sponsors/>

WHAT WE FOUND	2 H1 tags found: Support PyPI and related projects PSF sponsors
WHY IT MATTERS	Several H1s split the page's topical focus and confuse heading hierarchy.
RECOMMENDED FIX	Keep one H1 and demote the rest to H2.
EXPECTED BENEFIT	Sharper topical focus per page.

Support PyPI and related projects | PSF sponsors

H1 does not contain a target keyword

MEDIUM

<https://pypi.org/>

WHAT WE FOUND	H1 does not contain 'client challenge'.
WHY IT MATTERS	The H1 is a primary relevance signal for the page's main query.
RECOMMENDED FIX	Rewrite the H1 around the page's primary keyword.
EXPECTED BENEFIT	Improved ranking for the target term.

Find, install and publish Python packages with the Python Package Index

H1 does not contain a target keyword

MEDIUM

<https://pypi.org/help/>

WHAT WE FOUND	H1 does not contain 'two-factor authentication'.
WHY IT MATTERS	The H1 is a primary relevance signal for the page's main query.
RECOMMENDED FIX	Rewrite the H1 around the page's primary keyword.
EXPECTED BENEFIT	Improved ranking for the target term.

Common questions

H1 does not contain a target keyword

MEDIUM

<https://pypi.org/sponsors/>

WHAT WE FOUND	H1 does not contain 'python software foundation'.
WHY IT MATTERS	The H1 is a primary relevance signal for the page's main query.
RECOMMENDED FIX	Rewrite the H1 around the page's primary keyword.
EXPECTED BENEFIT	Improved ranking for the target term.

Support PyPI and related projects

Subheadings (H2/H3) never use target keywords

MEDIUM

<https://pypi.org/>

WHAT WE FOUND	No H2/H3 uses 'client challenge' or its variants.
WHY IT MATTERS	Subheadings map the page's subtopics; keyword-free headings weaken semantic coverage.
RECOMMENDED FIX	Work primary and secondary keywords into two or three H2/H3 headings.
EXPECTED BENEFIT	Better topical depth and featured-snippet eligibility.

Help; About PyPI; Contributing to PyPI

Subheadings (H2/H3) never use target keywords

MEDIUM

<https://pypi.org/sponsors/>

WHAT WE FOUND	No H2/H3 uses 'python software foundation' or its variants.
WHY IT MATTERS	Subheadings map the page's subtopics; keyword-free headings weaken semantic coverage.
RECOMMENDED FIX	Work primary and secondary keywords into two or three H2/H3 headings.
EXPECTED BENEFIT	Better topical depth and featured-snippet eligibility.

PSF Sponsorship; Get your logo on PyPI.org; Strengthen the Python ecosystem

Layout shifts during load

MEDIUM

<https://pypi.org/>

WHAT WE FOUND	Cumulative Layout Shift is 0.31 (target under 0.1).
WHY IT MATTERS	Content jumping around causes misclicks and fails Core Web Vitals.
RECOMMENDED FIX	Reserve space for images, ads and embeds; avoid injecting content above existing content.
EXPECTED BENEFIT	Passes CLS, better usability.

Keyword density unnaturally high

MEDIUM

<https://pypi.org/sponsors/>

WHAT WE FOUND	'python software foundation' density is 6.0% (19 uses).
WHY IT MATTERS	Over-repetition reads as spam and can trigger quality demotions.
RECOMMENDED FIX	Reduce exact-match repetition; use synonyms and natural variants.
EXPECTED BENEFIT	Avoids spam signals while keeping relevance.

19 occurrences in 957 words

/lms.txt is missing

MEDIUM

<https://pypi.org/lms.txt>

WHAT WE FOUND	/lms.txt returned 404.
WHY IT MATTERS	lms.txt is the emerging standard for telling AI assistants what your site offers and which pages to read.
RECOMMENDED FIX	Publish /lms.txt with a short business summary, key service URLs and contact details.
EXPECTED BENEFIT	Better representation in ChatGPT, Claude and Perplexity answers.

Duplicate meta descriptions

MEDIUM

<https://pypi.org/>

WHAT WE FOUND	Same meta description on 3 pages.
WHY IT MATTERS	Repeated descriptions signal templated, low-effort pages.
RECOMMENDED FIX	Write unique descriptions per page.
EXPECTED BENEFIT	Improves CTR and perceived page quality.

the python package index (pypi) is a repository of software for the python programming language.

Meta description has no target keyword

MEDIUM

<https://pypi.org/>

WHAT WE FOUND	Target keyword 'client challenge' is not in the meta description.
WHY IT MATTERS	Keywords in the description are bolded in results, which lifts click-through.
RECOMMENDED FIX	Work the primary keyword naturally into the first sentence.
EXPECTED BENEFIT	Better CTR and query relevance.

The Python Package Index (PyPI) is a repository of software for the Python programming language.

Meta description has no target keyword

MEDIUM

<https://pypi.org/help/>

WHAT WE FOUND	Target keyword 'two-factor authentication' is not in the meta description.
WHY IT MATTERS	Keywords in the description are bolded in results, which lifts click-through.
RECOMMENDED FIX	Work the primary keyword naturally into the first sentence.
EXPECTED BENEFIT	Better CTR and query relevance.

The Python Package Index (PyPI) is a repository of software for the Python programming language.

Meta description has no target keyword

MEDIUM

<https://pypi.org/sponsors/>

WHAT WE FOUND	Target keyword 'python software foundation' is not in the meta description.
WHY IT MATTERS	Keywords in the description are bolded in results, which lifts click-through.
RECOMMENDED FIX	Work the primary keyword naturally into the first sentence.
EXPECTED BENEFIT	Better CTR and query relevance.

The Python Package Index (PyPI) is a repository of software for the Python programming language.

Page has almost no internal links

MEDIUM

<https://pypi.org/project/102203594-topsis>

WHAT WE FOUND	Only 0 internal links on this page.
WHY IT MATTERS	Internal links pass authority and tell Google which pages matter.
RECOMMENDED FIX	Add 3-5 contextual links to related service or money pages.
EXPECTED BENEFIT	Better crawl depth and stronger money-page rankings.

Page has almost no internal links

MEDIUM

<https://pypi.org/project/1neuron-pypi-overlordiam>

WHAT WE FOUND	Only 0 internal links on this page.
WHY IT MATTERS	Internal links pass authority and tell Google which pages matter.
RECOMMENDED FIX	Add 3-5 contextual links to related service or money pages.
EXPECTED BENEFIT	Better crawl depth and stronger money-page rankings.

Page has almost no internal links

MEDIUM

<https://pypi.org/project/256-encrypt>

WHAT WE FOUND	Only 0 internal links on this page.
WHY IT MATTERS	Internal links pass authority and tell Google which pages matter.
RECOMMENDED FIX	Add 3-5 contextual links to related service or money pages.
EXPECTED BENEFIT	Better crawl depth and stronger money-page rankings.

Page has almost no internal links

MEDIUM

<https://pypi.org/project/3pc-panel>

WHAT WE FOUND	Only 0 internal links on this page.
WHY IT MATTERS	Internal links pass authority and tell Google which pages matter.
RECOMMENDED FIX	Add 3-5 contextual links to related service or money pages.
EXPECTED BENEFIT	Better crawl depth and stronger money-page rankings.

Page has almost no internal links

MEDIUM

<https://pypi.org/search/>

WHAT WE FOUND	Only 0 internal links on this page.
WHY IT MATTERS	Internal links pass authority and tell Google which pages matter.
RECOMMENDED FIX	Add 3-5 contextual links to related service or money pages.
EXPECTED BENEFIT	Better crawl depth and stronger money-page rankings.

Missing about / contact / policy pages

MEDIUM

<https://pypi.org/>

WHAT WE FOUND	No link found to: about, contact, privacy, terms.
WHY IT MATTERS	These pages are core E-E-A-T signals Google uses to judge trustworthiness.
RECOMMENDED FIX	Publish detailed About, Contact, Privacy and Terms pages with real business details.
EXPECTED BENEFIT	Stronger E-E-A-T and conversion trust.

checked crawled URLs and internal anchors

+ 3 more medium instances in the JSON export.

Low — 36 issues

No published/updated dates on content

LOW

https://pypi.org

WHAT WE FOUND	No visible published/updated dates on crawled pages.
WHY IT MATTERS	Perplexity and AI Overviews favour content with visible freshness signals.
RECOMMENDED FIX	Show published and updated dates and mirror them in schema (datePublished/dateModified).
EXPECTED BENEFIT	Better inclusion in freshness-sensitive AI answers.

Broken outbound links

LOW

<https://pypi.org/>

WHAT WE FOUND	Outbound link to https://docs.pypi.org/ returns 403.
WHY IT MATTERS	Dead outbound links are a quality signal and a poor user experience.
RECOMMENDED FIX	Replace with a live source or remove the link.
EXPECTED BENEFIT	Improves perceived content quality and trust.

anchor: 'Docs '

<https://pypi.org/>

WHAT WE FOUND	Outbound link to https://www.python.org/psf-landing returns 403.
WHY IT MATTERS	Dead outbound links are a quality signal and a poor user experience.
RECOMMENDED FIX	Replace with a live source or remove the link.
EXPECTED BENEFIT	Improves perceived content quality and trust.

anchor: 'Python Software Foundation'

H1 longer than 60 characters

LOW

<https://pypi.org/>

WHAT WE FOUND	H1 is 71 characters (limit 60).
WHY IT MATTERS	Long headings dilute the keyword and read poorly on mobile.
RECOMMENDED FIX	Tighten the H1 to under 60 characters, keyword first.
EXPECTED BENEFIT	Stronger keyword signal and better scanability.

Find, install and publish Python packages with the Python Package Index

Images without width/height attributes

LOW

<https://pypi.org/>

WHAT WE FOUND	11 images lack width/height attributes.
WHY IT MATTERS	Missing dimensions cause layout shift as images load, hurting CLS.
RECOMMENDED FIX	Set explicit width and height (or CSS aspect-ratio) on images.
EXPECTED BENEFIT	Lower CLS score.

```
